Four Habit-Forming Tips to Faster C++

Post by KDAB

1. Make use of the (named-) return-value optimisation (YES)
2. Return parameters by value whenever possible (YES)
3. Cache member-variables and reference-parameters (NO/MAYBE)
4. Organize your member variables intelligently (YES)

- ▶ P1108R0
 - ▶ [Reddit](#)

This paper proposes a `web_view` facility for the C++ standard library. This facility enables modern, natural, multimodal user interaction by leveraging existing web standards and technologies.
