# Introducing the Rule of DesDeMovA (1/4)

Blog post by Peter Sommerlad

<https://blog.safecpp.com/2019/07/01/initial.html>

[https://accu.org/content/conf2014/Howard\\_Hinnant\\_Accu\\_2014.pdf](https://accu.org/content/conf2014/Howard_Hinnant_Accu_2014.pdf)

Rule of Zero:

*Code that you do not write cannot be wrong.*

Do you Remember: What Special Member Functions Do You Get?

3

| What you write      | What you get        |               |                  |                 |                  |                 |
|---------------------|---------------------|---------------|------------------|-----------------|------------------|-----------------|
|                     | default constructor | destructor    | copy constructor | copy assignment | move constructor | move assignment |
| nothing             | defaulted           | defaulted     | defaulted        | defaulted       | defaulted        | defaulted       |
| any constructor     | not declared        | defaulted     | defaulted        | defaulted       | defaulted        | defaulted       |
| default constructor | user declared       | defaulted     | defaulted        | defaulted       | defaulted        | defaulted       |
| destructor          | defaulted           | user declared | defaulted (!)    | defaulted (!)   | not declared     | not declared    |
| copy constructor    | not declared        | defaulted     | user declared    | defaulted (!)   | not declared     | not declared    |
| copy assignment     | defaulted           | defaulted     | defaulted (!)    | user declared   | not declared     | not declared    |
| move constructor    | not declared        | defaulted     | deleted          | deleted         | user declared    | not declared    |
| move assignment     | defaulted           | defaulted     | deleted          | deleted         | not declared     | user declared   |

Howard Hinnant's Table: [https://ericniebler.com/2016/06/06/Howard\\_Hinnant\\_August\\_2014.pdf](https://ericniebler.com/2016/06/06/Howard_Hinnant_August_2014.pdf)

Note: Getting the defaulted special members denoted with a (!) is a bug in the standard.

Rule of DesDeMovA

Video Sponsorship  
Provided By:

02:19

Voting Closed

Summary 🍌 7

1. Rule of Zero
2. Rule of DesDeMovA (no copy, no move for SBRM/RAII and OO-Base classes)
3. Rule of Unique Resource Managers (move-only, no copy)
4. Rule of Five for Resource Managers with Value Semantics, or other really special cases
