NVIDIA HPC SDK

- Announcement

> *The NVIDIA HPC SDK C, C++, and Fortran compilers support GPU acceleration of HPC modeling and simulation applications with standard C++ and Fortran, OpenACC® directives, and CUDA®. <...> With support for NVIDIA GPUs and Arm, OpenPOWER, or x86-64 CPUs running Linux, the HPC SDK provides the tools you need to build NVIDIA GPU-accelerated HPC applications.*

- Accelerating Standard C++ with GPUs Using `stdpar`

C++ programmers now finally able to read linker errors in one line
